Terraform EC2

Terraform EC2/Jenkins

The screenshot displays a CentOS desktop environment. In the background, a terminal window shows the output of the `top` command, providing system statistics such as CPU usage, memory usage, and a list of running processes. Overlaid on the terminal is the Jenkins Setup Wizard window, which is titled "Getting Started" and "Customize Jenkins". The wizard provides instructions on how to install plugins, suggesting that users select plugins that the Jenkins community finds most useful or those most suitable for their specific needs. The desktop background is the standard CentOS logo, and the taskbar at the bottom shows the terminal and the Setup Wizard windows.
